EXHIBIT 1

2022 California Building Standards Code

FACTUAL FINDINGS ESTABLISHING THE REASONABLE NEED FOR LOCAL AMENDMENTS TO PORTIONS OF THE BUILDING STANDARDS CODE BASED UPON CLIMATIC, GEOLOGICAL AND/OR TOPOGRAPHICAL CONDITIONS OR ADMINISTRATIVE PROVISION

Section 1 of this Exhibit sets forth various findings that apply in Barstow, explaining the administrative provisions, various local climatic, geological and/or topographical conditions that necessitate the various changes.

Section 2 of this Exhibit explains which findings apply to which amendments.

In some cases, the City has opted to make findings even though it is not legally required to do so. For example, if a change to a building standard is administrative in nature, then no finding is legally required. Likewise, if a proposal does not contradict a building standard, but merely supplements the standard, then the city need not make a finding. The city nevertheless has sometimes opted to make findings in such circumstances.

Section 1. General Findings

The following findings apply in the City of Barstow, and explain why the changes to the Building Standards Code are necessary because of climatic, geological, topographical or local administrative regulations in the city.

A. Climatic Conditions

The City of Barstow is in a desert climate.

B. Geologic Conditions

The sandy and caliche soils in Barstow less able to support structures than soils commonly found in the more populated and less arid areas of California. As a result, people unfamiliar with the special construction needs build retaining walls and fences that are unable to withstand the forces placed upon them, and are unsafe as a result. It is not uncommon for unpermitted retaining walls or fences to completely fall over, thus endangering the public health, safety and welfare.

C. Topographical Conditions

Because of the city's desert conditions, and the inability of the soil to quickly absorb even a moderate amount of rainfall, flash floods are common in the city. Flooding occurs a few times each year. Improperly designed pools can overflow, thereby exacerbating flooding damage.

D. Administrative Regulations

Local regulations necessary to carry out the application of the Barstow Municipal Code that do not establish building standards may be enacted without meeting the requirements of Health & Safety Code sections 18941.5, 17958, 17958.5 and 17958.7. Additional amendments have been made to Codes. Such amendments are hereby found to be either administrative or procedural in nature which do not impact the technical standards within the California Building Standards Codes or concern themselves with subjects which are not covered in such Codes. The changes made include provisions making each of said Codes compatible with other Codes and Ordinances enforced by the City.

E. Not Applicable (N/A). No findings need to be made, because the code section that is at issue does not amend any building standard.

Section 2. Which Findings Apply to Which Amendments

Amendments to the 2019 Edition of the California Codes are found reasonably necessary based on the climatic and/or geologic conditions cited in Section 1 of this ordinance.
